YASHVI SHAH

Sihor, Bhavnagar, Gujarat | +91 9328337767 | yashvipshah80@gmail.com

PROFESSIONAL SUMMARY

Full-Stack JavaScript Developer with professional experience contributing to inventory/ERP and shipping/logistics applications. Works across React/Next.js, Node.js/Express, Vue/Nuxt, and Laravel/PHP codebases. Experience includes date-effective product pricing workflows, frontend integration with existing APIs, and configurable AI-provider integration.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript

Frontend: React.js, Next.js, Vue.js, Nuxt.js, Vuetify, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js

Databases: MongoDB, PostgreSQL, MySQL

Tools & Integrations: Git, Electron, REST APIs, AI API Integration

Additional Exposure: PHP, Laravel

PROFESSIONAL EXPERIENCE

MERN Stack Developer | Tretanz Infotech | February 2026 – Present

Contribute to existing business applications across inventory management, ERP, shipping and logistics, implementing feature changes and maintenance work across multiple stacks.

Inventrex — Multi-Tenant Inventory & ERP Platform

- Implemented frontend and backend changes for a multi-tenant inventory and ERP platform using Next.js, React, TypeScript and Node.js/Express with PostgreSQL-based services.
- Implemented a date-effective product pricing approval workflow for selling-price and cost-price changes, so approved prices apply from configured effective dates while earlier billing dates retain historical prices.
- Added validation to prevent conflicting price changes for the same product on the same effective date.

RTA Biz Desktop — Shipping & Logistics Desktop Application

- Developed frontend functionality and fixed UI bugs in an Electron desktop application built with Nuxt.js, Vue.js and Vuetify.
- Connected desktop screens to the existing RTA Biz backend APIs while keeping the established API contracts unchanged.

RTA Biz / ShipItJa — Freight & Courier Logistics Platform

- Implemented frontend and backend changes in an existing freight-forwarding and courier logistics platform using Laravel/PHP, Vue.js and MySQL.
- Extended AI-powered package scanning to support ChatGPT alongside Gemini by implementing backend provider selection and integration, with provider/API credentials configured through environment settings.

PERSONAL PROJECT

Shop Management System | Personal Project

Tech Stack: MongoDB, Express.js, React, Node.js

• Developing a shop management application for inventory, billing, purchases, suppliers, and customer management.

• Implemented role-based authentication and authorization, product and category management, and inventory stock tracking.

• Built purchase and sales workflows with stock updates, payment tracking, and invoice management.

• Implemented sales returns, refunds, and supplier ledger features with transaction integrity and financial consistency checks.

EDUCATION

B.Tech, Computer Engineering — Marwadi University | 2022–2026 | CGPA: 9.41
Higher Secondary — Vidyadhish Vidyasankul | 2020–2022 | 79%
Matriculation — Podar International School | 2020 | 76%

INTERNSHIPS & CERTIFICATIONS

Internships: Node.js Internship Preparation — Hackveda Limited | NestJS and Next.js Internship — Rock4Technologies
Certifications: Android Developer Course | Getting Started with Enterprise-grade AI — IBM | Flutter for Complete Beginners — freeCodeCamp
